

MiniMate/Delivery

MiniMate Pocket PC Mobiles

MiniMate/Delivery (MiniMate/DEL) runs on Pocket PC devices connected via Bluetooth, WiFi, cellular, or a direct wired connection through ActiveSync.

MiniMate/DEL mobilizes drivers and enables them to confirm delivery of product on handheld devices and print invoices. The information gathered in the field is wirelessly or batch synched directly from legacy accounting systems used in the office. The synching is easy and transparent, using ODBC connections and Sybase's MobileLink. This mobile module targets companies delivering products by company truck. **MiniMate/DEL** is simple to sell, install, and train. **MiniMate/DEL works with Prism's order taking system out of the box.**

MiniMate/DEL allows drivers in the field to:

- Load customers, inventory, and pricing on the PocketPC device.
- Confirm delivery of product on handhelds.
- Generate invoices on route.
- Capture signature and PO# as proof of purchase on the device.
- Print the invoice with signature at the site (optional).
- Upload wirelessly, cellularly or via batch methodology.

The **benefits** of **MiniMate/DEL** include:

- Importing the synched invoices to legacy accounts receivable module.
- Eliminating paper, faxes, and phone calls, as well as human errors.
- Speeding up the process of invoicing and collecting
- Creating an efficient and professional delivery personnel in the field
- Increasing the ability to make more deliveries per day.

MiniMate/DEL is designed with all of the award-winning features of Prism Visual Software's other mobile applications.
