

## **Prism Visual Software Wins 2005 Planet PDA Product of the Year Award For MiniMate Running on the CE device**

**Port Washington, NY – June 28, 2006 -- Prism Visual Software, Inc., is a winner of this year's 2005 Planet PDA Product of the Year Award.** Each year Planet PDA online magazine bestows its Product of the Year awards on companies that have demonstrated excellence in technological advancement and application refinements. The editors of Technology Marketing Corporation's (TMC®) Planet PDA online magazine announced the winners earlier this month.

“This year we received some really impressive submissions for the Planet PDA Product of the Year Award,” said TMCnet Associate Editor Patrick Barnard. “These entries further exemplify that unified communications isn't something that's coming—it's already here today.”

A designer of mobile software for CE devices, Prism Visual Software was also granted the award for related solutions in 2002 and 2003. Lorraine Keating, president, stated: “Our MiniMate solution has proven to be a solid, reliable, and user-friendly handheld solution for many service industries, especially in water treatment. I am pleased that PDA Planet magazine recognizes our newest mobile development, MiniMate running on CE devices.”

MiniMate is Prism's mobile handheld solution for product delivery, route sales and service, and pre-order. The handheld solution links field personnel with the office database and allows instant changes of services and deliveries en route. MiniMate captures signatures, prints invoices, controls truck inventory and customer onsite equipment, displays customer histories, and calculates sales taxes at item level.

Founded in 1997, Prism Visual Software is a privately owned software design company that specializes in the development of mobile routing software. Prism's desktop and mobile solutions serve a wide range of industries, especially beverage delivery and equipment servicing.
